OVERVIEW

DBS Group Holdings Ltd ("DBSH") prepares its condensed consolidated DBSH Group ("Group") interim financial statements in accordance with Singapore Financial Reporting Standard ("FRS") No. 34 Interim Financial Reporting, as modified by the requirements of Notice to Banks No. 612 "Credit Files, Grading and Provisioning" issued by the Monetary Authority of Singapore. The accounting policies and methods of computation applied for the current financial periods are consistent with those applied for the financial year ended 31 December 2011, with the exception of the adoption of new or revised FRS.

On 1 January 2012, the Group adopted the following new or revised FRS that are issued by the Accounting Standards Council, and are relevant for the Group:

- Conceptual Framework for Financial Reporting 2010 (Chapters 1 and 3)
- Amendments to FRS 107 Financial Instruments: Disclosures

The Amendments to FRS 107 require additional disclosures for all transferred financial assets that are not derecognised in their entirety, and those that are derecognised in their entirety but for which the transferor retains continuing involvement existing at the reporting date, irrespective of when the related transfer transaction occurred. The amendments also clarify the conditions under which an entity is deemed to transfer a financial asset or to have continuing involvement.

There is no material impact on the Group's financial statements from the adoption of the above revised FRS.

- Non-controlling interests are not included as equity in the computation of net book value and return on equity
 In June 2011, the MAS announced the Basel III requirements for Singapore-incorporated banks, which included a progressive phase-in for deductions against common equity starting from an initial 0% in 2013 and reaching 100% by 2018. If the 2013 deduction requirements were to be applied to the Group's March 2012 position, and without taking into account any other changes required by Basel III, the equivalent Core Tier 1 ratio would be 12.7%.

First-quarter net profit rose 28% from the previous quarter and 16% from a year ago to a record \$933 million. Total income crossed \$2 billion for the first time on sustained momentum across all businesses.

Net interest income rose 4% from the previous guarter and 19% from a year ago to a new high of \$1.34 billion. Loans grew 1% during the quarter and 25% from a year ago, while deposits rose 3% and 16% respectively. Net interest margins improved four basis points from the previous quarter to 1.77% as loan yields rose.

Non-interest income increased 31% from the previous quarter and 4% from a year ago to a record \$820 million from higher customer income, including wealth management, trade and remittances and treasury products.

Expenses of \$898 million were little changed from the previous quarter and 16% higher than a year ago and the cost-income ratio was healthy at 42%.

Asset quality remained strong. The non-performing loan rate was stable from the previous quarter at 1.3%, while specific allowance charges of nine basis points of loans were similar to recent quarters. General allowances of \$85 million were taken in line with a prudent provisioning policy. Allowance coverage rose to 128%.

The total capital adequacy ratio stood at 16.4%, with Tier 1 at 12.7% and core Tier 1 (with phased-in deductions) at 12.7%.

Return on equity reached 12.8%, the highest in several quarters, while return on assets was 1.09%.

Net interest income rose 4% from the previous quarter to \$1.34 billion as interest-bearing asset volumes and net interest margins increased.

Interest-bearing assets were higher than the previous quarter as the volume of customer loans and securities increased. Overall asset yields were also higher as an increase in loan yields more than offset the impact of lower securities and interbank asset yields.

Interest-bearing liabilities were also higher as the volume of customer deposits and other borrowings rose. Overall liability yields were stable.

Compared to a year ago, net interest income was 19% higher as the impact of higher interest-bearing asset and liability volumes was partially offset by lower net interest margins.

Notes:

Net fee and commission income rose 19% from the previous quarter to \$406 million from higher contributions in a wide range of customer activities, including wealth management, stockbroking, trade and remittances and loan-related activities.

Compared to a year ago, net fee income was 2% lower. Income from wealth management, trade and remittances and cards were higher, in line with efforts to grow these businesses, but they were offset by lower stockbroking and investment banking contributions. Strong IPO activity had boosted investment banking fee income a year ago.

Net trading income (including net income from financial instruments designated at fair value) rose to \$292 million from \$133 million in the previous quarter and \$258 million a year ago. The increase was due largely to higher customer flows for treasury products.

Customer flows continued to account for a significant portion of net trading income.

Total other non-interest income of \$414 million was 46% higher than the previous quarter and 12% higher than a year ago. Net trading income accounted for most of the change in total other non-interest income.

Expenses of \$898 million were little changed from the previous quarter. Higher staff costs in line with higher income was offset by a reduction in computerisation and other expenses, which had included seasonal items in the fourth quarter.

Compared to a year ago, costs were 16% higher as both staff and non-staff costs rose as investments were made in people and infrastructure to support higher business volumes.

The business segment results are prepared based on the Group's internal management reporting which reflects the organisation management structure. As the activities of the Group are highly integrated, internal allocation has been made in preparing the segment information. Amounts for each business segment are shown after the allocation of certain centralised costs, funding income and the application of transfer pricing, where appropriate. Transactions between segments are recorded within the segment as if they are third party transactions and are eliminated on consolidation.

The various business segments are described below:

Consumer/ Private Banking

Consumer/ Private Banking provides individual customers with a diverse range of banking and related financial services. The products and services available to customers include current and savings accounts, fixed deposits, loans and home finance, cards, payments, investment and insurance products.

Compared to the previous quarter, profit before tax rose 58% to \$219 million. Total income increased 3% to \$603 million from higher wealth management fee income. Expenses fell 15% to \$363 million due to lower non-staff costs, which had included seasonal items in the previous quarter. Allowances increased from \$15 million to \$21 million as both general allowances and specific allowances were higher.

Compared to a year ago, profit before tax was 65% higher from higher total income. Net interest income increased from higher loan and deposit volumes, while non-interest income rose as card and wealth

management fees increased. Expenses were little changed.

Institutional Banking

Institutional Banking provides financial services and products to institutional clients including bank and nonbank financial institutions, government linked companies, large corporates and small and medium-sized businesses. The business focuses on broadening and deepening its customer relationships. The products and services available to customers include a full range of credit facilities ranging from short term working capital financing to specialized lending. It also provides global transactional services such as cash management, trade finance and securities and fiduciary services; treasury and markets products; corporate finance and advisory banking as well as capital markets solutions. Institutional Banking also provides brokerage services for equities and derivatives products through DBS Vickers Securities (DBSV). DBSV itself offers a wide range of services to retail and corporate customers including research, sales and trading, share placement, nominees and securities custodian services and the distribution of primary and secondary share issues.

Compared to the previous quarter, profit before tax rose 70% to \$710 million. Total income rose 12% to \$1.10 billion from higher fee income and customer flow for treasury products. Expenses fell 15% to \$318 million as non-staff costs declined. Allowances fell 60% to \$74 million as the previous quarter had included specific allowance charges for one legacy shipping exposure.

Compared to a year ago, profit before tax was 10% higher as net interest income rose from higher loan and deposit volumes. This was partially offset by lower non-interest

Note:

1/ Refer to sections on Customer Loans and Non-Performing Assets and Loss Allowance Coverage for more information on business segments

income as the year-ago period had benefited from a major IPO. Expenses and allowances were higher.

Treasury

Treasury provides treasury services to corporations, institutional and private investors, financial institutions and other market participants. It is primarily involved in sales, structuring, market making and trading across a broad range of financial products including foreign exchange, interest rate, debt, credit, equity and other structured derivatives. Income from these financial

products and services offered to the customer of other business segments, such as Consumer/Private Banking and Institutional Banking, is reflected in the respective segments.

Others

Others encompasses a range of activities from corporate decisions and income and expenses not attributed to other business segments, including the execution of the Group's asset and liability interest rate positions and management of the investment of the Group's excess liquidity and shareholders' funds from current year onwards.

Notes

The performance by geography is classified based on the location in which income and assets are recorded.

Singapore

Net profit rose 16% from the previous quarter to \$547 million, while profit before tax increased by 32% as there was a net tax write-back in the previous quarter. The higher earnings were due to higher net interest and non-interest income as well as lower specific allowances, partially offset by an increase in expenses.

Net interest income rose 6% from the previous quarter to \$809 million from higher loan volumes and net interest margins. Non-interest income grew 30% to \$527 million as fee income and customer flows for treasury products increased.

Expenses were 13% higher at \$554 million as staff costs increased. Allowances fell 34% to \$119 million as specific allowances declined.

Compared to a year ago, net profit was 24% higher as an increase in net interest and non-interest income was partially offset by an increase in expenses. Allowances were little changed.

Hong Kong

The first quarter's results incorporate an appreciation of the Singapore dollar against the Hong Kong dollar of 2% from the previous quarter and 1% from a year ago.

Net profit rose to \$190 million from \$130 million in the previous quarter as non-interest income increased while expenses and allowances were lower.

Net interest income of \$209 million was stable from the previous quarter. Loans fell 1% while deposits rose 7% in local currency terms. Interest margins were stable at 1.34% as the impact of higher loan yields was offset by a larger proportion of non-loan assets in the asset mix.

Non-interest income rose 17% from the previous quarter to \$176 million. Higher customer flows for treasury products and gains from the sale of investments were partially offset by a decline in investment banking fees and trading gains.

Expenses fell 16% from the previous quarter to \$155 million as staff, computerisation and general costs declined. Allowances fell from \$24 million in the previous quarter to \$2 million as both specific allowances and general allowances declined.

Compared to a year ago, net profit was unchanged as an increase in net interest income from higher loan volumes was offset by a decline in non-interest income. Non-interest income declined due to lower sales of treasury products and investment banking fees. Expenses were unchanged while allowances were not materially different from a year ago.

Other regions

Rest of Greater China's net profit rose 53% from the previous quarter to \$55 million. Total income rose 12% to \$181 million from higher fee income and customer flow for treasury products. Expenses fell 8% to \$108 million due to

^{1/} The geographical segment analysis is based on the location where transactions and assets are booked

seasonal items in the previous quarter. Allowances halved to \$5 million as general allowances and specific allowances declined.

Compared to a year ago, net profit was little changed. An increase in total income was offset by higher expenses and allowances. There had been a net allowance write-back a year ago.

Net profit for South and South-east Asia rose 60% from the previous quarter to \$96 million. Total income grew 18% to \$167 million from higher fee income and customer flow for

treasury products. Expenses fell 16% to \$63 million led by lower non-staff costs. Allowances were stable at \$8 million.

Compared to a year ago, net profit was 28% higher as higher net interest income was partially offset by an increase in expenses.

Net profit for Rest of the World rose 29% from the previous quarter to \$45 million from a lower tax rate. Profit before tax was little changed. Compared to a year ago, net profit was little changed.

Loans by geography are classified according to where the borrower is incorporated

Gross customer loans rose 1% from the previous quarter and 25% from a year ago to \$201 billion. Excluding currency effects, loan growth was 3% from the previous quarter.

Loan growth during the quarter was led by Singapore-dollar corporate and consumer loans. Loans in Hong Kong fell 1% in local currency terms from the previous quarter as housing loans eased.

Includes customer loans classified as financial assets at fair value through profit or loss on the balance sheet

VALUE AT RISK AND TRADING INCOME

The Group uses a Value at Risk (VaR) measure as one mechanism for monitoring and controlling trading risk. The VaR is calculated using a one-day time horizon and a 99% confidence interval.

Back-testing is a procedure used to verify the predictive power of the value-at-risk calculations involving comparison of actual daily profits and losses adjusted to remove non-modelled items such as fee and commission income with the estimates from the value-at-risk model. In our back-testing for the period from 1 April 2011 to 31 March 2012, there were 5 outliers compared to 1 for corresponding prior period. The increased number of backtesting exceptions in current period were mainly clustered in August 2011 and triggered by the extremely volatile SGD interest rates movements when the SOR rate went negative in the Group's core market.

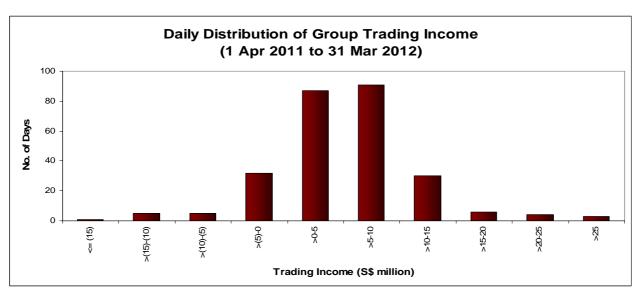

The following table shows the period-end, average, high and low VaR for the trading risk exposure of the Group for the period from 1 April 2011 to 31 March 2012. The Group's trading book VaR methodology is based on Historical Simulation VaR.

| - with phased-in deduction of 0% to end 2013 | 12.7 | 12.9 | 14.1 |
| - with full deduction | 10.9 | 11.0 | 11.5 |

Note:

The Group's total capital adequacy ratio improved from 15.8% at the end of the previous quarter to 16.4% primarily due to Tier 2 issuance totalling \$\$1.9 billion during the quarter. The issuance was intended to facilitate the redemption of existing Tier 2 instruments callable in May 2012, subject to regulatory approval.

The Group's Tier 1 ratio declined from 12.9% at the end of the end of the previous quarter to 12.7% due mainly to increase in riskweighted assets.

UNREALISED VALUATION SURPLUS

| (\$m) | 31 Mar 2012 | 31 Dec 2011 | 31 Mar 2011 |
|---|-------------|-------------|-------------|
| Properties ^{1/} | 578 | 580 | 527 |
| Financial investments classified as loans and receivables ^{2/} | 176 | 107 | 72 |
| Total | 754 | 687 | 599 |

The amount of unrealised valuation surplus increased from \$687 million in the previous quarter to \$754 million mainly due to improved valuations of financial investments.

In June 2011, the MAS announced the Basel III requirements for Singapore-incorporated banks, which included a progressive phase-in for deductions against common equity starting from an initial 0% in 2013 and reaching 100% by 2018. If the 2013 deduction requirements were to be applied to the Group's March 2012 position, and without taking into account any other changes required by Basel III, the equivalent Core Tier 1 ratio would be 12.7%.

INTERESTED PERSON TRANSACTIONS

DBSH has not obtained a general mandate from shareholders for Interested Person Transactions.

SUBSEQUENT EVENTS

On 2 April 2012, DBSH announced that it has entered into a conditional share purchase agreement with Fullerton Financial Holdings Pte. Ltd. to acquire 100% of its wholly-owned subsidiary Asia Financial (Indonesia) Pte. Ltd., which holds a 67.37% stake in PT Bank Danamon Indonesia Tbk (Danamon) for total consideration of IDR45.2 trillion (approximately \$\$6.2 billion). The total consideration would be paid in the form of 439 million new DBSH shares. Upon completion of the proposed acquisition, DBS will launch a mandatory tender offer to acquire the remaining listed shares from the other shareholders of Danamon.
